COLLAPSIBLE, STACKABLE, DURABLE

The Knock Down Pallet Deck features automatically deploying legs for improved time efficiency and reduced opportunity for safety hazards. When folded, the KDPD nests securely with other KDPD units to provide a safe and space-efficient storing and transportation solution. The KDPD is a self-contained system, which means no extra parts which could become lost or damaged. The fixed nesting legs interlock with the folding legs when extended for additional stability and better distribution of weight.

FEATURES

- 5,500 lbs WLL
- No tools needed for set-up or take-down
- Full Dimensions: 92 in x 56 in x 47 in
- Folded Dimensions: 92 in x 14.1 in x 47 in
- Patent Pending
- 260 lbs total weight
